stakpure | BOROSIL® Scientific

OMNIA PURE AND ULTRAPURE WATER SYSTEMS

For demanding applications in life sciences and labs

ABOUT BOROSIL SCIENTIFIC LTD.

A Legacy of Trust in Indian Laboratories

Borosil Scientific Ltd. is one of India's most trusted names in scientific and laboratory solutions, with a legacy spanning over five decades.

What began with high-quality laboratory glassware has evolved into a comprehensive scientific ecosystem serving laboratories across pharmaceuticals, research, diagnostics, academia, and industry.

Today, Borosil Scientific is recognized not just as a manufacturer, but as a long-term partner to laboratories, delivering products that combine precision, reliability, and compliance with strong after-sales support.

LABQUEST®
BY BOROSIL Scientific

A Complete Instrumentation Platform for Modern Laboratories in our LabQuest product range

BOROSIL SCIENTIFIC'S STRENGTH IN INDIA

- Nationwide distribution network
- Strong service and application support
- Deep penetration into pharma QC, academia, diagnostics, and CROs
- Proven understanding of Indian laboratory conditions
- Commitment to quality, consistency, and customer confidence

From Distillation to Advanced Purification

Borosil Scientific's journey of expansion in laboratory water systems

1962
Entry into scientific products and laboratory glassware

2008
Laboratory glassware manufacturing facility, Bharuch (Gujarat)

2015
Launch of LabQuest | Entry into laboratory instrumentation

2020
Introduction of on-demand distillation units

2024
Launch of quartz cabinet distillation units (QCD)

2026
Launch of advanced water purification systems in collaboration with StakPure GmbH

ABOUT STAKPURE

StakPure GmbH — German Expertise in Water Purification

Driven by German engineering principles and a strong focus on precision, consistency, and long-term reliability, StakPure delivers water purification systems designed for demanding analytical, research, and quality control applications worldwide.

StakPure GmbH is a Germany-based specialist dedicated to the design and manufacture of pure and ultrapure laboratory water systems. With over 25 years of industry experience across laboratories on all continents, StakPure has established itself as a trusted global partner for high-performance laboratory water solutions.
StakPure systems are trusted by laboratories across Europe and international markets, and are engineered to meet stringent global standards, including:

- ASTM
- ISO 3696
- CLSI Reagent Water guidelines

This enables laboratories to access **Type I, Type II,** and **Type III** water solutions under a unified, globally aligned platform.

Key highlights of the collaboration:

- Equivalent global purity standards now available with local support
- Systems designed for consistent performance and low cost of ownership
- Complete coverage from RO water to 18.2 MΩ·cm ultrapure water
- Seamless integration with Borosil Scientific's existing SDU, DDU, and QCD distillation portfolio

Omnia

Pure and ultrapure water systems

Convenient. Compact. Adaptable.

Scroll and swipe to the next function. There is no simpler and more intuitive way to operate a touch display. Even with laboratory gloves. This makes routine work steps fun but also faster and safer. Adjustable limit values for conductivity and TOC, as well as data output via USB increase process reliability.

Pivotable up to 170 degrees and 80 cm diameter

Color touch display* with intuitive menu navigation (* 3 background colors adjustable)

- Real time display of all operating and performance parameters
- Real time TOC monitoring (for OmniaTap I + II & OmniaLab ED+)
- Switchable temperature compensation
- Setting possibilities for conductivity in MΩ x cm or µS/cm
- Limit value setting for all measuring parameters
- High precision measure-ment and display
- Withdrawal volume individually adjustable
- Innovative monitoring and display of cartridge capacity
- Secure password access and error memory
- Language selection DE, EN, FR

Well connected

- USB interface for data transmission / output
- RS232 interface

Removable & ergonomic shaped (can be operated with laboratory gloves)

Press button withdrawal

OneHandOperation -Dispenser

Leakage sensor is standard

Automatic voltage adjustment

The Omnia series is extremely convenient to use. All devices are fitted with the OptiFill touch OneHandOperation-Dispenser with intuitive control- and monitoring unit.

One-handed operation, removable, rotatable and swiveling with flexible connection for easy water dispensing into any type of container.

The ergonomic shaped dispenser is intuitive operable.

The easily accessible control and service cover ensures that consumables can be replaced in seconds.

Three background colors – black, gray or blue – the choice is yours!

Residual cartridge volume display

Ready for USB transfer

OmniaTap

The allrounder.

For H_2O pure types I + II.

OmniaTap is the ideal system when both pure water and ultrapure water are required, but in relatively small amounts. The ability to provide both types from a single system results from the combination of ultramodern purification technologies. These also make it possible to connect the system directly to tap water. With the flexible dispenser, type I ultrapure water can be dispensed at the touch of a button. The adaptable pure water tanks with a volume of 10, 30 or 60 liters enable the continuous withdrawal of type I and type II laboratory water for other applications.

Features

- OptiFill touch dispenser is standard
- TapWater-Set – direct tap water connection
- Tank volume display in percent
- Simple and economical filter replacement
- Leakage sensor is standard
- Ready-to-use, including filter cartridges

One hand operation

Easy water dispensing

Flexible on a work surface

10-liter docking tank
Can be mounted directly on the appliance, space-saving and efficient.

30-liter tank
Flexible installation – on the laboratory bench or under bench in the laboratory cabinet, with or without base.

60-liter tank
Ideal for larger quantities of water – also suitable for under table installation* without a base.

* Installation height with tank ventilation filter 80 cm

OmniaLab^{ED+}

The big one.

For H_2O pure types I + II.

OmniaLab^{ED+} is the system of choice when both pure water and ultrapure water are needed for the entire laboratory. The system complies with international water standards such as ASTM, ISO 3696 and CLSI. The economy of it is maximized by the inclusion of a continuously self-regenera ting electrodeionizer, without having to give any demanding analytical applications a pass. Further to this, the OmniLab-$^{ED+}$ system holds 100 liters of pure water type II ready for withdrawal in a storage tank with quality recirculation. It is so predestined for supplying autoclaves or lab washing machines and the dispensing of type I ultra pure water for analytical and bioscience applications.

Features

- OptiFill^{touch} dispenser is standard
- Continuous residual salts removal by electro-deionization
- 100 liter storage tank with recirculation and pressure outlet
- Tank volume display in percent
- Tank volume can be modularly increased
- Simple, cost-effective filter replacement
- Leakage sensor is standard

One hand operation

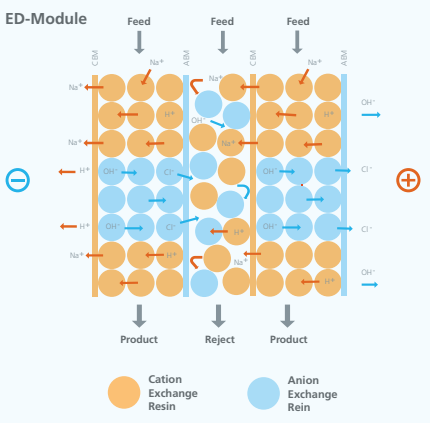
ED-Module



OmniaTap II

The allrounder.

For H_2O pure type ASTM II.

The OmniaTap II is the ideal system when pure water is required in small amounts. The system combines compact dimensions with great flexibility and is suitable for direct connection to the drinking water pipe. The OptiFill touch dispenser integrated as standard is an all-rounder. The ergonomic shape allows all quality parameters to be operated and monitored with one hand. With the flexible dispenser & monitoring unit, laboratory vessels can be filled conveniently and precisely. Decide for yourself how much valuable space you want in the laboratory, whether mounted on the wall to save space or on the laboratory bench. With the flexible dispenser, ultrapure water can be dispensed at the touch of a button. The adaptable pure water tanks with a volume of 10, 30 or 60 liters enable the continuous withdrawal of type II laboratory water for other applications.

Features

- Safe pure water quality ASTM II
- TapWater-Set – direct tap water connection
- OptiFill touch Dispenser is standard
- Simple and economical filter change
- Leakage sensor is standard

One hand operation

Easy water dispensing

Fits neatly on the wall

10-liter docking tank

Can be mounted directly on the appliance, space-saving and efficient.

30-liter tank

Flexible installation – on the laboratory bench or under bench in the laboratory cabinet, with or without base.

60-liter tank

Ideal for larger quantities of water – also suitable for under table installation* without a base.

* Installation height with tank ventilation filter 80 cm

OmniaLab ED

The efficient one.

For H_2O pure type II.

OmniaLab ED is the efficient solution when high quality pure water type II is required for the complete lab supply. It is compliant with international water standards, such as ASTM, ISO 3696, CLRW (CLSI), and the combination with continual self-regenerating electro-deionization brings maximized economy. Further to this, the OmniaLab ED system holds 100 liters of pure water in a storage tank with quality recirculation, ready to supply lab equipment. OmniaLab ED is the efficient one for supplying autoclaves, lab machines and ultra-pure water systems.

Features

- OptiFill touch dispenser is standard
- Continuous residual salts removal by electro-deionization
- 100 litre storage tank with recirculation and pressure outlet
- Tank volume display in percent
- Tank volume can be modularly increased
- Simple, cost-effective filter replacement
- Leakage sensor is standard

One hand operation

Easy water dispensing

Flexible on a work surface

Tank fits space-savingly under the bench-top

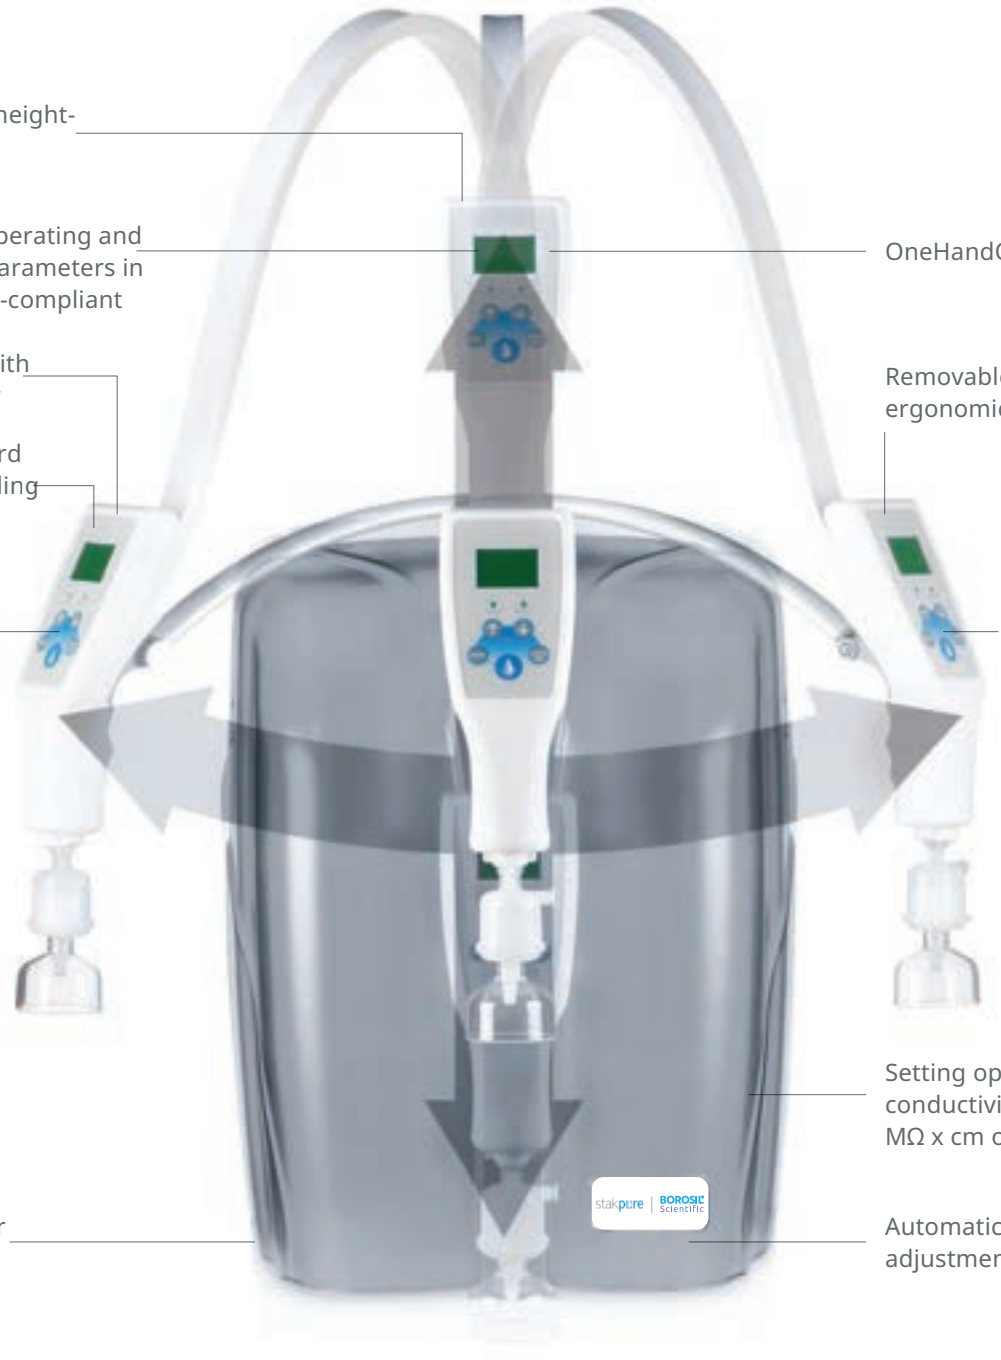
Omnia
Pure and ultrapure water
Comfortable. Compact. Flexible.

OptiFill Dispenser is standard



The Omnia series is extremely easy to handle. All appli - ances are equipped with the OptiFill OneHandOperation dispenser with integrated operating and monitoring unit. It can be operated with one hand, is removable, rotatable and height-adjustable and has a flexible con - nection for convenient water dispensing, regardless of the container.

The ergonomically shaped dispenser is very easy to use.

The easily accessible operating and service cover enables consumables to be changed in seconds.

OmniaLab UP

The constant one.

For H_2O pure type II.

OmniaLab^{UP} is the system of choice when you need a constant supply of high-quality water in laboratories. For this, OmniaLab^{UP} holds 100 liters of type II pure water in reserve in a storage tank with quality recirculation. It is an optimal supplier to autoclaves, lab rinsing machines and ultrapure water systems. The water produced conforms to international medical technology water standards such as ASTM, ISO 3696 and CLRW (CLSI).

Features

- OptiFill Dispenser is standard
- 100 l tank with quality recirculation and pressure outlet
- Tank volume display in percent
- Tank volume can be modularly increased
- Simple, cost-effective filter replacement
- Leakage sensor is standard

One hand operation

Easy water dispensing

Flexible on a work surface

Tank fits space-savingly under the bench top

OmniaLab DS

The reliable one.

For H_2O pure type II + CLRW (CLSI) + DIN EN 285 + EN ISO 15883

When safety is first priority and the quality of the purification decides the quality of results, then the OmniaLab DS system is the perfect solution. Even for large pure water quantities of up to 60 l/h, OmniaLab DS guarantees international water standards compliance. The combination of regenerative polishing cartridge and an optional emergency supply makes this system extremely reliable for supplying clinical analytical systems, as well as for feeding water to steam sterilizers and washer-disinfectors.

Features

- OptiFill Dispenser is standard
- 100 l tank with quality recirculation and pressure outlet
- Tank volume display in percent
- Tank volume can be modularly increased
- Simple, cost-effective filter replacement
- Leakage sensor is standard
- Emergency supply (optional)
- Degassing unit (optional)

OmniaLab^{RO}

The big one.

For H_2O pure type III.

The OmniaLab^{RO} is used when there is a need for constant large quantities of reverse osmosis water in the laboratory. The system meets international water standards such as type III. In addition, the OmniaLab^{RO} system holds 100 liters of reverse osmosis water in a storage tank ready for withdrawal. This system is used to supply autoclaves, laboratory dishwashers, humidifiers and ultrapure water systems.

Features

- OptiFill Dispenser is standard
- With 100 l pure water tank
- Tank volume display in percent
- Tank volume can be modularly increased
- Leakage sensor is standard

One hand operation

Easy water dispensing

Flexible on a work surface
